## SOME REFLECTIONS ON A BOILING COPPER.

"The copper's boiling"—this is the common phrase of early Monday, the housewife's call to the weekly task. Let us follow it with a question that is not so simple as it sounds: "What is it boiling for?" Most people would answer, "Why, to boil the dirt out of the clothes, of course." Quite so, but for health's sake something more than dirt has to be done away with in the household washing, namely, the seeds of infectious disease.

Infection may be communicated to a whole city (and beyond it) from one single patient, of which the smallpox epidemic is a case in point. It is due to tiny organisms, hardly visible through a microscope, but intensely alive, thrown off in the course of the disease. These float in the air or dust and drift to clothes and house linen as naturally as steel draws to a magnet; we call them "germs," or seeds of disease, because just as an ordinary seed grows to a plant, so a disease germ on a human body breeds disease; the only protection against germs is to destroy them.

The question is: Will boiling water and common soap do it? Not always; some disease germs may thrive or even breed in both. So we must use a cleanser that will not only clean clothes and house linen thoroughly; but also kill all disease germs that have lodged in them. Fortunately for us, manufacture and science have combined to meet this want with Lifebuoy Soap. By using Lifebuoy Soap in the laundry the germs of infectious diseases are caught and killed wholesale, because Lifebuoy Soap is both a perfect laundry cleanser and a strong disinfectant as well, and when the household clothing and linen are washed with it, disease germs find destruction instead of a refuge.

Our crowded population doubles the risk of infection. Lifebuoy Soap reduces it; but Lifebuoy Soap must be so used as to cover both cleansing and disinfection; Lifebuoy Soap for the bath, Lifebuoy Soap for floors and walls, Lifebuoy Soap for kitchen and scullery, and when the copper boils on Monday morning, then let it be especially and always Lifebuoy Soap for the day's washing.

## MONKEY BRAND

The Housewife who uses Monkey Brand for Spring Cleaning is never tired of singing its praises. Monkey Brand saves labour and does its work quickly, yet so thoroughly that the house is clean and fresh from attic to cellar.

## AN INDIAN MEMORY.

## THE TRIAL OF TILAK.

(BY J. R. H.)

A brief paragraph in a recent issue of the "Herald" announced the return to India of Mr. Ganganath Tilak, after a long period of imprisonment in Australia, Tasmania, and the small settlements of the Indian people. As I read the few lines which told of his return to Western India, there flashed across my mind one whom a memory of that evening six years ago, when I was in the High Court of Bombay, and heard sentence passed upon the famous Indian journalist and Nationalist. As editor of a widely-circulated Marathi newspaper based in Poona, Mr. Tilak was a man of the first rank in the virile ability of man—distrust, the venomous criticism to which he subjected every British Government officer and act, but at length the limit of Government patience was reached.

The guarded warning of Lord Sandhurst (then Governor of the Presidency), had been disregarded, while the more serious admonitions of the then Governor, Sir George Clarke (now Sir Sydenham), had been ignored. But in the early morning of the 21st of August, the greatest "patriot" among us, surrounded himself with the prison force which he had so long made a special target for his direct attacks. From Poona he was removed to Bombay, and there for some days his trial proved the centre of all interest for European and Indian alike. At the trial of circumlocution, the Judge ruled that the trial of a criminal soldier was not a criminal trial, and the majority had defended Tilak successfully on a similar charge. The prosecution for the Crown was conducted by Mr. H. R. Branson, the Attorney-General of the day, while for the defence appeared a large array of the most able Indian counsel then practising at the Bombay Bar. As was to be expected, after police were called in to remove the crowd, hairs were split with the forensic ability which only an Eastern mind could derive, but all was in vain. When the long case had come to its close, the verdict was unhesitatingly for the Crown, and in a crowded Court—the entrances to which were closely guarded by scores of armed police, who mutinied, restrained the audience, and then threatened to burn the building—Tilak was given his sentence. Standing by his solicitors' table, Tilak patiently listened to the severely judicial tones of him who had formerly been his friend, but now was his judge. His immobile countenance gave no hint of the thoughts which must have been surging through his brain. Only once could an instant of vacillation be seen, when he yielded for a moment to a fit of rage, and the Judge used words to the effect that it would be well for the prisoner in his removal for some years from that country he so "professed" to love. The bitter word stung, but the training inherited from centuries of self-restraint stood the prisoner in good stead, and he stood until the mastery of himself. So he stood until the final words were spoken and the sentence passed.

As the term of transportation was announced in Justice Davar's closing sentence, the solemn stillness of the crowded courtroom was broken, and before the former quiet had been restored the Tilak had been hurried from the Bar. Then the police in charge of the building, having given the alarm, the building became, even to the outer corridors and passages, a scene of tumult. There were thousands of natives of every creed and caste. To many Tilak was but a name, but to almost all that night he was a martyr, another son of India who had suffered in the cause of their common motherland! To convey the prisoner through such a mob, such a time, was a task which only those who shared his fate, or those of Indian origin, could properly appreciate. Through private corridors and through a forgotten doorway in a darkened portion of the building, the prisoner, closely surrounded by a strong posse of armed police, was hurried to a waiting motor car, and even before the knowledge of the sentence had filtered to the crowds outside Tilak had been bundled with his escort into a train waiting at a near-by railway station, which had been informed of his arrival by the British Court and Administration. He was still bound to the train as it was rushing towards the mainland, carrying its valuable passenger to Agra Gaol, there to spend the preliminary month of his incarceration.

Meanwhile this sentence had reached the waiting crowd, and as those inside the court emerged their eyes fell on a bewilderment sight. Tilak had been bundled with his escort into a train waiting at a near-by railway station, which had been informed of his arrival by the British Court and Administration. He was still bound to the train as it was rushing towards the mainland, carrying its valuable passenger to Agra Gaol, there to spend the preliminary month of his incarceration.

Meantime this sentence had reached the waiting crowd, and as those inside the court emerged their eyes fell on a bewilderment sight. Tilak had been bundled with his escort into a train waiting at a near-by railway station, which had been informed of his arrival by the British Court and Administration. He was still bound to the train as it was rushing towards the mainland, carrying its valuable passenger to Agra Gaol, there to spend the preliminary month of his incarceration.

The Housewife who uses Monkey Brand for Spring Cleaning is never tired of singing its praises. Monkey Brand saves labour and does its work quickly, yet so thoroughly that the house is clean and fresh from attic to cellar.

## THE "TERRIBLE MAN."

The Primate of Ireland tells a story about

a charity sermon preached by his predecessor.

Two very Scotto-Irish farmers had this con-

versation after the service: "Well,

you know, Mr. Bishop, we have got to pay

the tithe, but we have not got to pay

the tithe, but we have got to pay

MINTER, SIMPSON, & CO.,  
Union Bank Chambers, Hunter-street, Sydney.

#### BROKERS :

All Recognised Members of the Stock Exchange  
of Australasia.

The Company has been formed to acquire from the Vendor, Arthur Percival Freeman, his interest in Twenty Motorbus Chassis of the world-famous "Benz" manufacture on order, together with other options for the building of bodies and the supplying of tyres, which options are held by the said Arthur Percival Freeman, and will prove extremely valuable to the Company.

The said Arthur Percival Freeman will transfer to the Company his valuable agency for the "Benz" Motorbuses, the said Arthur Percival Freeman being sole concessionaire for all territory within a ten miles radius of the Sydney General Post Office, with the selling right (for the territory mentioned) for a term of two years.

As consideration for the abovementioned options the transferring to the Company of the Agency for the "Benz" Motorbuses, and the supplying of valuable information regarding the working of the Motorbus business, the vendor is to receive 5000 shares fully paid up to 10/-, together with the sum of £250 in cash.

The celebrated "Benz" is so well known as to render anything more than passing reference superfluous. The "Benz" omnibus has for years been running successfully in other countries, and has attained a popularity that is as convincing as it is deserved.

The "Benz" cars have competed in every reliability event of note held during the past two years in any part of Australia, and have won practically every event for which they competed, thus effectually demonstrating their high standard of efficiency.

It is proposed to establish in Sydney a Motorbus Service similar to that inaugurated by Mr. A. P. Freeman, the Vendor, in Melbourne, and so successfully conducted there by him. Sydney and Suburbs have hitherto

been overlooked in the matter of cheap and fast Motorbus Services, and it is intended to at once establish what to the public will be a convenient and economical means of transit, and to the shareholders a highly profitable investment.

Mr. Arthur Percival Freeman has agreed to act as Managing Director of the Company for a term of five years from the date of incorporation, upon the terms set out in the contract hereinafter referred to, and the Company should profit by the experience possessed by Mr. Freeman.

#### A COMPARISON OF THE RETURNS OF MOTORBUSES v TRAMWAYS IS INTERESTING.

It should be borne in mind that the bulk of capital in Tramways is absorbed in the construction of the Permanent Way, Power House, etc., whilst in operating Motorbuses the entire capital, with the exception of the car shed and small working capital for current working expenses, is revenue earning.

In London the County Council's Tramways carry the largest number of passengers per car mile of track probably in the world, yet the cost per tram vehicle represents a capital outlay of £5,000, whilst the cost of a motorbus in Sydney is about £1,150, presumably, therefore, an 8 per cent. dividend on a tramway venture in Sydney would make about 40 per cent. in Motorbus operation, because of the earning power being so much greater in comparison to capital outlay. For instance, the revenue of the London General Omnibus Co. in 1912 (the Company was bought out by the Underground Electric in 1913) was about £3,000,000, an amount almost equal to the capital of the Company. During the same period the County Council tramways earned about the same amount,

#### BUT THE TRAMWAYS COST ABOUT £12,000,000 TO INSTALL.

The "Commercial Motor," May 29, 1912, says: "London Motorbuses are now carrying passengers at the rate of a daily average of 1,870,000, which fact may be cited as evidence of the public demand for these vehicles."

Motorbus traffic is beginning to surpass all other systems in profit-earning capacity, Motorbuses affording more convenient and cheaper means of transit for short distances than railways.

The Motto of the Motorbus, WE CARRY YOU FROM DOOR TO DOOR, is obtaining this rapidly increasing share of public patronage.

The Melbourne "Age," in a special article dealing with the subject, mentions "The arrival of the Motorbus in Melbourne, and its extraordinary potentiality in speed, mobility, economy," and goes on to say it is "An enterprise in which success is certain, and whose future possibilities with the growth of the metropolis are quite as assuring as any undertaking in which considerable capital might be employed."

If this is true of Melbourne, then what of Sydney, whose city and suburbs present opportunities of Motorbus operation that are non-existent in Melbourne? The same article states that in London electric trams cannot hold their own against petrol buses, though the former run at equal speed.

#### RAILWAYS AND TRAMWAYS SURPASSED INTERESTING FIGURES.

Official figures as published in the "London Mail," July 26, 1913, of the passengers carried during the year 1912 by the various companies catering for the passenger

traffic in London, tend to show what popular favour is extended to Motorbuses.

Metropolitan District Railway, passengers 83,003,149

London United Electric Tramways, passengers 61,139,285

London General Omnibus Co., Ltd., passengers 492,853,934

The traffic returns of the London General Omnibus Company show a GAIN IN TWELVE WEEKS OF £184,000 on the corresponding period of last year ("Daily Mail," April 12, 1913). It is considered that the success of the Motorbus in Melbourne will prove to be but a small thing beside that which awaits Motorbus operation in Sydney. This handsome and luxuriantly appointed vehicle, swift and silent, to be placed by the Company upon our streets, is a machine distinct in every way from any vehicle yet seen here, and will surely prove a boon to those persons who desire a comfortable, speedy service at a reasonable charge.

The following contract has been entered into, and it is believed that it is the only one material for the information of intending shareholders. A copy of it may be inspected by intending subscribers at the offices of Messrs. Minter, Simpson, and Co., Union Bank-chambers, Hunter-street, Sydney.

Agreements dated the 30th day of July, 1914, between Arthur Percival Freeman of the one part, and Motorbus Services, Limited, of the other part.

The above-named copy agreement and this specification must be accepted by applicants for shares as a sufficient compliance with Section 66 of the Companies Act, 1899.

#### PROSPECTUSES AND APPLICATIONS FOR SHARES.

Prospectuses and forms of application for shares can be obtained from the Secretary (pro tem.) at the offices of the Company, 13 and 14 Savings Bank-chambers, Moore-street, Sydney. Dated 31st July, 1914.

## THE WAR

ALL EUROPE.  
PEACE STILL IN THE BALANCE.

## BRITAIN'S POSITION.

## THE ENTENTE.

## QUESTION OF OBLIGATIONS.

## FURTHER DETAILS OF THE FIGHTING AROUND BELGRADE ARE REPORTED.

The Russian mobilisation is on a general scale, and it was expected that Austria would declare war on Russia yesterday.

The all-important question in Britain is whether her obligations under the Triple Entente will involve her participation in the war should Germany and France be implicated as well as Russia.

Several London newspapers unanimously declare that Britain must stand by France. It is pointed out that if Britain announced that the invasion of Belgium or France would be followed by a blockade of the North Sea, it would strengthen the probabilities of peace.

The "Daily News" and other influential opinions are that Britain is not bound to intervene, and that only the weightiest reasons could drive her into the conflict.

A statement that Germany had demanded from Russia an explanation of the latter's mobilisation received wide acceptance, but was denied in official quarters yesterday morning.

Alarming statements in France are reprinted, and a more hopeful tone prevails among French diplomats. An official announcement has been made that France will not mobilise unless Germany does.

The London Stock Exchange has been closed for the first time in its history.

## THE FIGHTING.

## BOMBARDMENT OF BELGRADE

## LONDON, July 31.

The Serbian Legation announces that the bombardment of Belgrade was resumed at 6 o'clock on Thursday, and the principal streets were shelled.

Several spies who gave information to the Austrian artillery were captured in an hotel.

An official message from Vienna on Thursday evening stated that the Serbian machine guns at Belgrade opened fire at mid-night.

Austrian monitors carrying 47 guns remained, bombarding the city, and blowing up the powder magazine.

The Serbians at dawn made another unsuccessful attempt to destroy the bridge, of them being captured.

The Austrian Artillery demolished it. Shrapnel fire broke out at different parts of the town.

The Serbians are massing their main forces in the Morava Valley, between Kragujevac and Krusevac.

An artillery duel was reported yesterday to be in progress near Smederevo, 20 miles south of Belgrade.

Official statements of the war state that only small skirmishes have occurred so far.

Military critics are of the opinion that the Austrian left crossed the Danube near Semearia, about 25 miles south-east of Belgrade, and the centre at Rata and Loynta.

Only small bodies of Serbians are opposing the Austrian right, which is delayed by doubt of the Montenegrin attitude.

It is estimated that there are 150,000 Austrian troops invading from Semearia, 190,000 from Krusevac, 150,000 from Sarajevo, and 100,000 from Milovac.

A letter from Vienna shows that the mobilisation is unprecedented since 1866. It included not only the Landsturm, but all men up to 50 years of age were ordered to present themselves 20 hours later.

It adds that troops are being sent to the Galician border and the Lower Danube.

It is believed that Austria's main purpose is to revise the treaty of Bucharest, and restore to Bulgaria the fruits of the Balkan war.

## THE SERVIAN VERSION.

## BELGRADE, July 31.

The Serbian account of the hostilities states that at 11 o'clock on Wednesday night the Austrians opened their second attack on Belgrade with a heavy cannonade.

The batteries at Semlin and the guns on the opposite bank began firing until 2 o'clock this morning.

The Serians only occasionally replied.

The Serians vigorously repelled an attempt to cross the river. No Serian losses are reported.

## GENERAL PUTNIK.

## BUCHAREST, July 31.

General Putnik, Chief of the Serbian General Staff, has arrived at Sercovo, on the Hungarian border. He is suffering severely from asthma.

## BRITAIN'S POSITION.

## PEACE OR WAR.

## LONDON, July 31.

Reuter's Agency learns from diplomatic circles that everything now depends upon Germany's reply to a proposal that she should suggest a diplomatic way out of the crisis which will meet with Austria's approval.

Waiting with regard to the situation was rather more pessimistic; that the previous day, owing to the increase of the military party's influence in Germany and the fear that some of the Powers do not want a settlement.

Reuter's correspondent in Berlin said yesterday that "waiting for war" sums up the condition of things in Germany, and that all the symptoms of a coming catastrophe prevail."

There is much discussion in the lobbies of the House and in the newspapers concerning Britain's position in the event of a European conflict.

Mr. Asquith's replies to questions by Lord Robert Cecil and Mr. J. King in the House of Commons in March, 1913, in which he stated that Britain was under no secret obligation to send troops to the Continent, are recalled.

A meeting of the Liberal members of the

House of Commons strongly objected to the newspaper columns assuming that the country was under a treaty obligation to take part in Continental hostilities.

Lord Lamington in a letter to the newspaper, protests against newspaper representations that fidelity to the Entente renders necessary for Britain to participate in that war, and recalls Mr. Asquith's statement. Lord Lamington adds that the balance of power policy is anticipated. The safety of India and the overseas dominions is of greater importance than a possible defeat of France. If the press encouraged France and Russia to make war on Austria a general war must necessarily follow.

Very powerful influences are working for peace.

Sir Edward Grey, Secretary of State for Foreign Affairs, is having continual interview with the German Ambassador, Prince Lichnowsky, and the Austrian Ambassador, Count Mendorff, but events are moving with dangerous rapidity.

House of Commons strongly objected to the newspaper columns assuming that the country was under a treaty obligation to take part in Continental hostilities.

Lord Lamington in a letter to the newspaper, protests against newspaper representations that fidelity to the Entente renders necessary for Britain to participate in that war, and recalls Mr. Asquith's statement. Lord Lamington adds that the balance of power policy is anticipated. The safety of India and the overseas dominions is of greater importance than a possible defeat of France. If the press encouraged France and Russia to make war on Austria a general war must necessarily follow.

The "Daily Mail" says: "When France is in peril and fighting for her very existence, Britain cannot see her friend stricken and the du-alliance weakened. We must stand by our friends, if only because without their aid we cannot be safe. Failure to organize a British nation to meet new contingencies is a serious blow to our duty to France, which we have neglected in the past."

The "Daily Mail" calls upon the workers to wage war against war, and to support the anti-war movement in Germany. It calls upon trade unions and socialist organisations to demonstrate to this end.

The Daily News says: "None but the mightiest reasons could drive us into conflict and to risk the splendour of the Empire. Honour, pride, and interest dictate the absolute neutrality of Britain. There are no treaty obligations in the Dual Alliance, and the war involves no question of principle. Russia's victory would make her the dictator of Europe."

The Daily Graphic says: "Mr. Asquith's impatience is to be deplored. His considered efforts in various quarters to predict the course of British policy in certain contingencies which have not arisen. Nothing could be more prejudicial to the high pacific role Britain has assumed in this crisis."

It is understood that the German military authorities are preparing for immediate mobilisation.

German diplomatic circles point out that they are unable to give any pressure to bear on the Emperor to stop the war, but will continue to do so.

Germany desires France and Britain to approach Russia, while she takes steps as regards Austria. The question of peace or war will be decided upon Russia's reply, since Germany has decided to secure a decisive answer to the intimation that she is unable

to wage war against war, and to support the anti-war movement in Germany. It calls upon trade unions and socialist organisations to demonstrate to this end.

One thousand soldiers and 600 police have been drafted to Woolwich to protect the magazines and stores.

There is much activity in the Tilbury Dock area. The Dublin Fusiliers, with machine guns,

## THE SCENE OF FIGHTING.

The fighting has so far been entirely confined to this narrow area in the north-east of Serbia. The position to-day is believed to be that at least one of the three Austrian armies has crossed the Serbian frontier—the army of the centre (at Smederevo), and probably the army of the south (at Novi Sad). The army of the north (at Zemun) is not yet known to have crossed the frontier. The number of the rascals—said to be 150,000 strong—is probably delayed at Sarajevo owing to some uncertainty as to whether Montenegro, which is just off its southern flank, has or has not decided to join Austria. An army of 150,000 Austrians is said to have crossed the frontier, and to be moving on Belgrade, and are invading Serbia from there. The main Serbian army, according to yesterday's cables, is near Krusevac, in the valley of the River Morava and its tributaries.

The fighting has so far been entirely confined to this narrow area in the north-east of Serbia. The position to-day is believed to be that at least one of the three Austrian armies has crossed the Serbian frontier—the army of the centre (at Smederevo), and probably the army of the south (at Novi Sad). The army of the north (at Zemun) is not yet known to have crossed the frontier. The number of the rascals—said to be 150,000 strong—is probably delayed at Sarajevo owing to some uncertainty as to whether Montenegro, which is just off its southern flank, has or has not decided to join Austria. An army of 150,000 Austrians is said to have crossed the frontier, and to be moving on Belgrade, and are invading Serbia from there. The main Serbian army, according to yesterday's cables, is near Krusevac, in the valley of the River Morava and its tributaries.

## DEFENCE.

## GOVERNMENT POLICY.

## LABOUR'S ATTITUDE.

## SPEECH BY SENATOR MILLIN.

Speaking at the Moseman Town Hall last night, the Minister for Defence (Senator Millin) said:—

"When Australia was admitted and welcomed to the councils of the Empire, it was no longer possible for her people as a self-respecting community to continue the recipients of protection afforded by the government, and at the expense of the taxpayers of the Empire. This was the first of the reasons why Australia was admitted to take up seriously the question of defence. It was then liberally approached as a duty which Australia owed to itself and to the Empire. And it is because it is alike a duty and a necessity that I want to direct attention to the tendency becoming increasingly manifest to tamper with it. I refer to the distinct change in the character of our foreign policy towards this great national question. It is not long since that the members of the Labour party loudly proclaimed themselves the only true champions of Australian defence. To-day their attitude is that of open hostility, or, still more dangerous, lukewarmness. They still repeat the old phrase, 'They will talk of defence, but they are not prepared to defend it,' but it is clear that they are shrink from that steady effort which is essential if Admiral Henderson's scheme is to be adhered to, and the navy made efficient for its intended purpose. They still talk of the Australian military system, but they are proposing, against all expert advice, changes which will weaken every founda-

"This changed attitude," continued Senator Millin, "is not merely a weakening of seal, it is an abandonment of principles to which they have hitherto professed adherence. It is an opportunism bordering on perfidy for a few votes. I should not make that statement only that I consider the changed attitude of that party amounts to a distinct abandonment of the principles of the cause of Australia. It is an effort, at a critical stage in the development of your defence, to will not merely destroy the good work already accomplished, but will hamper the future with the paralysis of uncertainty."

"In the early days of Federation, when defence held but a small place in the national scheme, it was necessary for it not to be apparent, in other words, when it was not popular, the Labour party, by its vote in Parliament, and by the words of its then leader, Mr. Watson, declared that half a million sterling was the most that ought to be spent under this heading. A few years later, when defence had grown in popular favour, the Labour party took it up with almost hysterical fervour. Now, when the same principles are held, when the open opponents of defence have marshalled their forces, when many are apprehensive as to the expenditure involved, the Labour party is making a cynical bid for their support by calling a halt that policy of steady development which alone can make for success."

"Let me direct attention," he continued, "to the marked change in the party's official attitude as described by the members of its leadership. In the election of 1910, the gentleman in his policy speech said: 'It is proposed to continue to carry out the naval policy on the lines of the scheme laid down by Admiral Henderson, and during the ensuing three years to proceed to build up a fleet to consist of one battleship, one battlecruiser, one destroyer, one submarine, one supply ship. The cost of these would total £2,500,000, probably more, and they would proportionately increase the naval defence bill by £100,000 a year.'

"Sydney, in its building programme, Mr. Fisher submitted in 1911 was sound, why is it that neither that nor any substantial programme finds a place in his present manifesto? There is but one answer. Twenty months ago, the party popular to a large extent in its policy of defence, and it is idle to shut our eyes to the fact, an organised effort is being made to destroy your defence scheme, either by radical departure from the principles upon which they are founded, or to reduce this impotence by a period of stagnation."

"I am not asking for approval of reckless extravagance. In the term of the party in power, I have very reasonably demanded expenditure in an endeavour to eliminate waste. By the introduction of more business-like methods, much more can be done in this direction, but we have a very large expenditure, of which the bulk is in defence, in this direction. Here again, there is a sharp difference of policy between the two parties. The Labour party professes that such a large expenditure is to be proceeded to with a minimum of waste, and the party in power has adopted the policy of waste."

"In contrast to this vacillation, to which I have directed attention, I will place the policy of the government. I have very reasonably demanded that it is to follow, step by step, in Kitchener and Henderson schemes. In pursuance of this policy we have already taken steps to have built the additional ships which are now in hand, and the defence programme should be constructed in the next four years. But warships, without adequate shore establishments to provide for their needs would be largely useless, and we are probably going to carry out Admiral Henderson's recommendations in this direction. Here again, there is a sharp difference of policy between the two parties. The Labour party professes that such a large expenditure is to be proceeded to with a minimum of waste, and the party in power has adopted the policy of waste."
